

PUTTING UP YOUR RESPECT BANNERS

Please ensure your banners are pulled tight when they are being fastened, for example to fencing. Use the tie wraps to secure the banners by fixing one corner and pulling the tie wrap tight.

Then ensure the next ring of the banner is pulled tightly as well before securing with another tie wrap.

All eyelets should be fixed to the fence using a tie wrap. If the banners are not secured tightly they will flap in the wind and this may damage them.

Finally, for best results, fix the banner to a flat wire fence or similar structure. Avoid fixing to uneven or irregular surfaces.

All fixings should be fixed to the fence using a tie wrap

Fixings should be pulled tight

Bungees are a useful alternative for hanging the banner, but only if the banner is hanging for a limited time.
